WORKING STUDENT CAD & PRODUCT MANAGEMENT SUPPORT
15-20 h

» Future-oriented medical field
» Independent work environment
» Innovative medical products and projects
» Your chance to leave your footprint
» Diverse work environment and open-minded corporate culture

About PIUR

PIUR IMAGING is an innovative AI-company that re-invents the third dimension of ultrasound. From our offices in Vienna and Munich, we turn standard ultrasound systems into 3D tomographic imaging devices, bridging the gap between 2D ultrasound and regular tomographic 3D imaging modalities. Together, we want to revolutionize the medical imaging market and provide patients better access to safe and affordable imaging diagnostics.

Your Role

For our Munich office, we are looking for a working student for 3D modelling and product management support. As a part of our dynamic team, you will specialize in CAD modelling and 3D printing. You will furthermore carry out system tests and support our product management team with system installations and customer support.

Skills & Qualifications

» Excellent English skills, German skills are a plus
» Engineering (or related) studies, beneficial: medical engineering
» at least 5th semester
» CAD skills (ideally Solidworks)
» Strong interest in medical imaging, especially (ultrasound)
» Interest in working with physicians in a clinical environment
» Confident in customer contact
» You enjoy working in a fast-moving field with regular innovations
» High level of independence and self-organizations
» Open-minded and strong team player
» Beneficial: basic knowledge about 3D printing processes

Responsibilities

» CAD modelling (SolidWorks)
» Independently handling 3D printer and 3D scanner
» Support product managers with system installations and setups in clinics remotely and on site (Europe, mainly DACH region)
» Technical customer service (remote)
» Execution and documentation of system tests
» Support the creation of QM documents (MDR and FDA)
