About PIUR

PIUR IMAGING is a medical-technology company headquartered in Austria and specialized in Tomographic Ultrasound diagnostic solutions. With our innovative product, we turn standard ultrasound systems into 3D tomographic imaging devices, bridging the gap between 2D ultrasound and regular tomographic imaging modalities. Together, we want to revolutionize the medical imaging market and provide patients better access to safe and affordable imaging diagnostics.

Your Role

For our Munich office we are looking for a working student for medical image processing and data labelling. As a part of our dynamic team, you will specialize in ultrasound images and work on data labelling and analysis. Within our research projects, you will also work closely with our clinical partners in thyroid diagnostics, vascular surgery, internal medicine, and neurology.

Responsibilities

- » Collect and archive medical image datasets from research projects
- » Processing and labelling of medical ultrasound data
- » Direct collaboration with our international R&D team and external clinical partners
- » Take responsibility for your own projects

Skills & Qualifications

- » Excellent English skills, German skills are a plus
- » High level of independence and self-organization
- » Strong interest in medical imaging, especially ultrasound
- » You enjoy working in a fast-moving field with regular innovations
- » Open-minded and strong team player
- » Beneficial: Medical background (study level)
