

JUNIOR SOFTWARE DEVELOPER

Full-time

PIUR IMAGING is an innovative AI-company that re-invents the third dimension of ultrasound. From our offices in Vienna and Munich, we turn standard ultrasound systems into 3D tomographic imaging devices, bridging the gap between 2D ultrasound and regular tomographic 3D imaging modalities. Together, we want to revolutionize the medical imaging market and provide patients better access to safe and affordable imaging diagnostics.

Your Role

For our growing team, we are looking for a Junior Software Developer eager to grow. As a part of our R&D team in Vienna or Munich, you actively participate in the development process, helping to constantly take PIUR IMAGING's clinical applications to the next level. You instantly apply your programming knowledge in an innovative environment while deepening your skills. If you enjoy continuous professional development and are motivated to become an expert in medical imaging software development, we are looking forward to meeting you!

Responsibilities

- » Continuously develop our software
- » Gradually become our frontend development expert
- » Actively identify potential for improvement and find solutions
- » Develop clinical domain knowledge and help transfer user requirements into software
- » Work in close collaboration with product management and sales

Skills & Qualifications

- » Ready to learn and try out new technologies
- » Independent and proactive work attitude
- » Open-minded and strong team player
- » Programming skills in C++/Python
- » Experience in frontend development
- » Beneficial: Experience in working with version control & CI tools
- » Excellent English skills
- » Enjoy working in an innovative field and staying on track with technical developments and applications

What we offer

We believe that the personal fit is just as important as qualifications. That's why creating an open-minded work space that values the individuality of each team member is one of our core values. We attach great importance to respectful communication and an environment that is free of discrimination. If you enjoy working in an international and motivated team don't hesitate to get in touch!

- » Apply your knowledge as a valued team member from day one
- » Actively shape the appearance and performance of our product
- » Collaborate with and learn from our highly experienced and motivated developers
- » Independently handling your projects, no micro-management
- » Short communication channels and close cooperation between all departments
- » Work in a future-oriented, fast improving medical field
- » Flexible working hours with home office options
- » Diverse work environment and open-minded corporate culture
- » Familiar atmosphere
